## PROJECTS

### AI MENTAL HEALTH THERAPIST CHATBOT

An AI-powered mental health chatbot designed to provide empathetic emotional support, psychoeducation, and stress-relief exercises while guiding users to professional resources during crises. It aims to enhance accessibility and promote mental well-being with a user-friendly, ethical approach.

### 3D PRINTED AUTOMATED BOT FOR PEST DETECTION AND ELIMINATION FOR TOMATO CROPS

A 3D-printed automated bot designed for tomato crops, capable of detecting pests using advanced sensors and AI and eliminating them through eco-friendly methods. This innovation enhances precision, reduces pesticide use, and promotes sustainable farming practices.
